

CUSTOM SERVICE TOOLS FOR FIFTH WHEELS

TF-TLN-5001

Fifth Wheel Lock Adjustment Tool

Designed specifically for the Holland FleetMaster top plate, but can be used with other Holland fifth wheels as well. Designed for checking fifth wheel locking action and lock adjustment during periodic adjustment or rebuilding.

TF-TLN-1500

3 1/2" Fifth Wheel Lock Adjustment Tool

These Holland kingpin lock testers are designed for checking fifth wheel locking action and lock adjustment.

TF-TLN-2500

Slider Spring Compressor

Designed exclusively for removing and installing springs, retainers and pins of the slide release mechanisms of Holland sliding fifth wheels. For best results, operate with a 5/8" socket and ratchet wrench.

TF-0237

2" Plug

This 2" plug is used only for checking and adjusting the kingpin locks of the Type "B" fifth wheel during periodic maintenance. It also is designed to assist in lock installation and adjustment during rebuilding or lock replacement.

TF-0110

Kingpin Gage

The TF-0110 kingpin gage is a simple, multipurpose, economical gage for indicating an undersized condition and need of replacement of 2" and 3 1/2" SAE kingpins. This unique gage can also be used to check kingpin length and for checking straightness and flatness of the upper coupler or bolster plate.
