OEM, 7-STITCH
WELDED WEB

NEW STEEL,
NO CORE

BUILT FOR
BC TERRAIN

ASSEMBLED
IN CANADA

FMVSS 121 RATED
FOR 23,000 LBS

HD5000 is a higher friction brake lining that has superior resistance to wear from contamination. Its high friction and high temperature range make it ideal for heavy loads, off-road applications and refuse trucks.

- Our most powerful friction material
- Ideally suited for high-temp applications where contamination from road conditions is a factor
- Excellent lining life & good drum compatibility
- Outstanding stopping power across all temperature ranges
- Asbestos-free brake lining
- Fibreglass based friction materials run quieter, wear better, and vibrate less
