

AIR SPRINGS

TUFF PRODUCTS FOR TOUGH APPLICATIONS

TuffLine® Air Springs are designed for use in the toughest commercial vehicle working environments and are constructed for maximum suspension performance and life.

TuffLine® Air Springs are produced by a world-leading manufacturer of air suspension bellows, using the highest quality materials that are designed for strength.

Air springs are manufactured in a facility that holds ISO 14001, ISO 9001 and ISO/TS 16949 quality certificates.

- Air springs go through life cycle durability and bursting tests, conducted under different assembling heights and pressure
- Products are designed and tested for leak resistance
- Corrosion-resistant top plate
- Convolute air springs are available in single, double and triple types, in sizes ranging from six to sixteen inches in bellows diameter, for all truck and trailer applications.
- Cabin air springs allow for greater driver comfort and less fatigue, improving driver safety and productivity
- Choose from products containing aluminum, steel or composite (plastic), to best fit your need and your application

Check your tires, shock absorbers and air valves to ensure maximum air spring product performance.

AIR SPRINGS

PART #	DESCRIPTION	INTERCHANGE	INTERCHANGE
TAS6897	Double Convolute Air Spring	W01-358-6897	2B9-229
TAS6902	Double Convolute Air Spring	W01-358-6935	2B9-201
TAS6910	Double Convolute Air Spring	W01-358-6910	2B9-200
