

Custom Mud Flaps

LOGO PROCESS

SILKSCREEN

Using a stencil (screen) of your company's logo, paint is transferred to the mud flap. Multi-color logos require multiple screens.

RAISED LOGO

A custom mold is created for your company's logo and used for the production of the flap itself. After the flap is produced, the colors get applied on top of the raised portion by the silkscreen process.

HOT STAMP

Using vinyl material, color(s) for your logo are pressed into a flap at high temperatures. This process is considered to be the most durable for logos as the color will not fade or scrape off.

KANWAL

RUBBER FLAPS (3/8" Thick)

- Additional thickness of 1/8" for the raised logo portion (not included on silkscreen-only version)
- Rubber produced with fiber-reinforced material
- Rainguard backing

Artwork: Custom requests will require a high resolution version of your logo, preferably in vector format (EPS). Please allow 3 to 5 business days to receive an artwork proof.

Other mud flap options available: Includes different sizes, thicknesses, header types, poly colors, and more. Additional charges may apply. Not all options may be available for the artwork process type. Contact your CBS Parts Representative for details.

Effective: June 1 - December 31, 2024
